## Study:

### The Sustainability of Packaging Systems for Fruit and Vegetable Transport in Europe based on Life-Cycle-Analysis

For the first time, an accurate picture was obtained of the European market as a whole, by studying and evaluating the transport routes taken by fruit and vegetables from the five most important producer countries (France, Spain, Italy, Netherlands and Germany) and the four largest markets (France, Netherlands, United Kingdom and Germany). The study compares the whole life cycle and selected social aspects between commercial plastic crates used in multi-way systems and wooden and cardboard boxes - both one-way systems.

To order the study, please fill in the form below and send it to C HOCH 4 GmbH (responsible for distribution on behalf of SIM) per Email: [choch4@t-online.de](mailto:choch4@t-online.de) or via Fax: ++49 -33205-24038
